Title: **Report of QoS discussions**

Document for: infomation

Contributions on QoS were considered for 22.105 for inclusion of text from contributions in annex and extraction of requirements for the main body of draft.

➢   Text taken from TDs 310,306 and 362 ,this should be reformated so as not to repeat issues then put in an annex as background information.

➢   Requirements to be extracted from TD's 310,306 and 362 and put in made body of text

➢   Tables from TD 306 to be developed based on requirements and put in main body of the text

➢   Text to be modified to reflect addition of table and requirements.

➢   Definition of new concepts to be added for clarity, e.g. Defination of streaming

➢   A definition of Qof S was proposed in TD 293. With the removal of the last line this should be included as a definition in 22.015. The entire proposal should be captured in the body of the draft.

➢   Draft CRs to be distributed by 17ᵗʰ May for e-mail agreement CRs in 371 and 372

➢   Agrred CRs by 31ˢᵗ May

➢   Drafts to be sent to S2 as unagreed drafts for information

Key issues noted:

➢   A requirements is that UMTS should be able to work with internet
➢   UMTS should support available IP mechanisms. SI should liase with IETF to influence work there to add internet support by UMTS
➢   QoS monitoring is required as a result of QoS negotiation as a requirement
➢   All requirements must be clearly written from a service perspective
➢   Delay/jitter important requirement

TD 292 was superseded by events, 327 no additional requirements were identified in adddition to other contribution but it was noted that some text may be useful, editor to decide. 328 useful text – may wish to draw on use for annex and analysis for table, editor to decide.

TD 329- Proposal for deletion of 5.6,5.7 but only agreed to delete bullets in 5.6
