

Opportunity of creating a new TS for covering different “5G enhanced” services"

How to handle Work Items requiring a new TS?

- Situation
 - 22.261 constantly growing in size (22.261 V18.2.0: 85 pages)
 - TSes created for topics important but small in size - most of them unlikely to grow much in the future
 - Size of stage 1 TS as well as number of TSes should be kept within bounds!
 - 22.261 will grow further by updates to existing sections, but new sections on new topics should be avoided
 - Growing TS numbers make it difficult to get a full picture of what 5G supports!
- Proposal
 - Create an umbrella TS to accommodate new and smaller topics ("SMARTER BITS") unlikely to grow much in the future
 - If a normative WID intends to (a) create a TS or (b) add a new section to 22.261 it is up to SA1 to decide on the landing pad for the outcome of this WI, either:
 1. Add outcome to a new section in the umbrella TS
 2. (a) create standalone TS to accommodate the outcome of the WI
 3. (b) create 22.261 section to accommodate the outcome of the WI
 - Rapporteur's work and responsibilities unaffected - will either take care of umbrella TS section or - like today - new TS.
