---

Dear Colleagues,

CableLabs thanks 3GPP SA2 for LS S2-2303690 regarding "Support of wireline access and FWA for accessing Stand-alone private network." CableLabs appreciates the inclusion of supporting access to Stand-alone non-public network (SNPN) via wireline access network in Rel-18 for both 5G-RG and FN-RG. The support for both 5G-RG and FN-RG for SNPN access is valuable from our member's perspective.

CableLabs will take into account the requirements in attached SA2 agreed CRs that applies to 5G-RG and FN-RG.

Sincerely,

Yunjung Yi  
Director of Wireless Standardization  
CableLabs
