_____

CN1 thanks SA3 for their Liaison Statement on the above subject. The group discussed this subject, and concluded the following:

- In CN1's opinion, the need for this feature is not great, especially in comparison with other pressing security matters.

- The work required to support such a feature needs careful consideration and has a relatively large impact on the specifications under the group's control.

- If SA3 remain of the opinion that this feature should be implemented, then CN1 would be happy to consider it as a work item for Release 2000.

In summary, CN1 predict a considerable amount of work to implement the feature and do not feel they can do this work for Release 99. Doing so may have negative affects on more important issues.
