_____

LS for "IM Subsystem Address Storage on USIM"

SA2 has considered document S2-002010 "IM Subsystem Address Storage on USIM" proposing:

In order to ensure easy portability of services from one UE to another by the subscriber, the subscriber identity and the Home domain name of the UE (contained e.g. in a SIP URL), should be stored on the USIM of the UE for the case where the UE is an embedded SIP client. The storage location for the case where the UE contains a stand alone SIP client connected to an ME is FFS.

SA2 requests the consideration and comments of T2, T3, CN1 and SA3 regarding this proposal before approving for inclusion in the IM Subsystem Technical Specification.
