Title: **Draft liaison statement to CN4 regarding Positive Authentication Reporting**

Document for: **Modification and approval**

Agenda Item: **6.2**

To: 3GPP CN4

From: 3GPP SA3

Subject: Positive Authentication Reporting

Contact: Greg Rose, QUALCOMM Australia

The liaison statement on Positive Authentication Reporting from CN4, N4.000844, states that it would be possible to support PAR in Release 2000. SA3 welcomes this and requests that such work proceed. A work item to support Global Roaming has been approved (Unique ID 2026, Enhanced HE control of security). This feature should not wait for further work on global roaming.
