Name: Peter Howard

peter.howard@vf.vodafone.co.uk

S3 would like to highlight two security work items included in the latest version of the 3GPP work programme:

1. Work item 1624: Security aspects of reliable QoS for PS domain and IM subsystem

The workplan states that input is due from S2 by 06/00. S3 have not yet received any input and request that S2 provide input as soon as possible so that any necessary work can proceed in S3. The current end date of 09/00 will be revised by S3 once the scope of this work item has been identified.

2. Work item 1617: Prevention of user fraud concerning TrFO OoBTC solution

The workplan states that input is due from N4 by 08/00. S3 have not yet received any input and request that N4 provide input as soon as possible so that any necessary work can proceed in S3. The current end date of 03/01 may be revised by S3 once the scope of this work item has been identified.

The latest version of the workplan is available at:
