**Title: Draft LS about ciphering of RRLP messages between SMLC and MS in GPRS**

---

S3 thanks GERAN for their LS (TSG 000769). The issue in the LS was introduced and briefly discussed in S3 meeting. Due to time pressure it was not possible to come into any conclusion about any preferences between the proposed approaches. S3 is prepared to allocate enough time in their next meeting in February to be able to conclude the matter.
