1. Overall Description:

T2 wishes to thank SA4 for its prompt replies regarding our enquiries regarding features of extended streaming service in PSS rel 5. Particularly, two features are of interest to T2 with respect to MMS:

- Upload streaming which may be used by MMS for uploading streamable content.
- Digital rights management – the ability to restrict redistribution of protected, private or copyrighted media to other MMS recipients.

In order to complete in time the Rel 5 specifications of MMS , T2 would like to know the status of standardization of extended PSS and particularly the status of those two features

2. Actions:

To SA4.

ACTION: T2 asks SA4 group to send us a description of the proposed extended PSS, the proposed specification, and if possible , even send a representative to the next T2 meeting who will present extended PSS and help us progress in integrating these features into the MMS specifications

3. Date of Next T2 Meetings:
