

CHANGE REQUEST

⌘ **33.102** CR **CRNum** ⌘ rev **-** ⌘ Current version: **3.b.0** ⌘

For **HELP** on using this form, see bottom of this page or look at the pop-up text over the ⌘ symbols.

Proposed change affects: ⌘ (U)SIM ME/UE Radio Access Network Core Network

Title:	⌘ Correction of (U)SIM toolkit security reference		
Source:	⌘ Vodafone		
Work item code:	⌘ Security	Date:	⌘ 10 May 2002
Category:	⌘ F Use <u>one</u> of the following categories: F (correction) A (corresponds to a correction in an earlier release) B (addition of feature), C (functional modification of feature) D (editorial modification) Detailed explanations of the above categories can be found in 3GPP TR 21.900 .	Release:	⌘ R99 Use <u>one</u> of the following releases: 2 (GSM Phase 2) R96 (Release 1996) R97 (Release 1997) R98 (Release 1998) R99 (Release 1999) REL-4 (Release 4) REL-5 (Release 5)

Reason for change: ⌘ The reference to 23.048 is R99 is wrong since 23.048 does not exist in Rel-99. TS 23.048 replaces GSM 03.48 from Rel-4 onwards.

Summary of change: ⌘ The reference to 23.048 is replaced with a reference to 03.48. (also minor correction to GSM TS 02.48)

Consequences if not approved: ⌘ Incorrect reference.

Clauses affected:	⌘ 2, 5.4.1
Other specs affected:	⌘ <input type="checkbox"/> Other core specifications ⌘ <input type="checkbox"/> <input type="checkbox"/> Test specifications <input type="checkbox"/> O&M Specifications
Other comments:	⌘

The following documents contain provisions which, through reference in this text, constitute provisions of the present document.

- References are either specific (identified by date of publication, edition number, version number, etc.) or non-specific.
- For a specific reference, subsequent revisions do not apply.
- For a non-specific reference, the latest version applies. In the case of a reference to a 3GPP document (including a GSM document), a non-specific reference implicitly refers to the latest version of that document *in the same Release as the present document*.

*** NEXT MODIFICATION ***

5.4.1 Secure messaging between the USIM and the network

USIM Application Toolkit, as specified in [3GPP TS 31.111](#) [15], provides the capability for operators or third party providers to create applications which are resident on the USIM (similar to SIM Application Toolkit in GSM). There exists a need to secure messages which are transferred over the network to applications on the USIM, with the level of security chosen by the network operator or the application provider.

Security features for USIM Application Toolkit are implemented by means of the mechanisms described in [3GPP TS 03.48](#) ~~23.048~~ [7]. These mechanisms address the security requirements identified in [GSM TS 02.48](#) [16].
