1. Overall Description:

SA2 appreciate receiving the Liaison that SA4 sent as a response to an LS from SA1 regarding the work item description for Packet Switched Streaming in R6. SA2 would like to provide the following feedback.

SA2 confirms that SA2 has the overall responsibility for the system architecture and coordination of architectural aspects. Therefore, SA2 welcome a close cooperation with SA4 regarding PSS and related items in R6. Especially with regard to streaming media for conversational IMS services as well as possible interactions with user profiles in the framework of GUP. DRM is another feature where SA2 would like to see close cooperation.

SA2 will review the requirements on features for Release 6, such as PSS, DRM, GUP and IMS, and will coordinate the interrelations of the features and define the architecture. The more detailed work for PSS is expected to remain under the responsibility of SA4.

Regarding the bullet point list of PSS functionality, SA2 has the following questions:

- Is the “rough prioritisation order” only made with respect to the work that SA4 has to carry out for R6 or is it also intended to cover the corresponding work to be done in other 3GPP working groups?
- What aspects are included in the “pre-transport adaptation”?
- What is the scope of the “PSS QoS Metrics” and “Implications of IPv6” items?

SA2 would appreciate to continuously receive information regarding these topics and topics that have architectural impacts.

2. Actions:

Action for SA4:

SA2 kindly asked SA4 to consider the statements expressed in this LS as well as to provide a response to these statements and more specific questions.

3. Date of Next SA2 Meetings:

| Title | Date | Location |
|--------|--------------------------------------|-----------------|
| SA2#26 | 19 th August –August 2002 | Toronto, Canada |
