                        Draft TR Wireless Local Area Network (WLAN) Interworking Security

---

1. Overall Description:

SA3 would like to thank SA1 for outlining their understanding of the Ownership, Operations and Internetworking Trust issues with WLAN interworking. SA3 are in agreement with SA1 views on Ownership and Operations.
On the issue of trust, SA3 assumes that this will need to be considered in the context of the SA2 architecture as described in 3GPP System to WLAN Inter working architecture TR 23.934 V 0.3.0. SA3 will be defining a trust model based on this architecture and will include it as an informative annex in their TS Wireless Local Area Network (WLAN) Interworking Security.

NOTE: The attachment is in the form of a TR, but it will be converted to a Draft TS soon. The full content of the draft has not been approved by SA3.

2. Actions:

To SA1 group.

ACTION: SA3 asks the SA1 group to note the attached documents

3. Date of Next 3GPP TSG SA WG3 Security Meetings:

Meeting	Date	Location	Host
S3#25	8 - 11 October 2002	Munich, Germany	Siemens
S3#26	19 - 22 November 2002	ETSI TBA	ETSI
