ITU-T Study Group 13 Question 15 “NGN Security” is pleased to inform you about our recently started studies of the media security in the context of the Next Generation Network.

We are investigating the media security protection mechanisms for RTP and the corresponding key management mechanisms within our draft Recommendation “Y.SecMechanisms” (particularly, in the clause 7.1.2), which is attached for your review.

Question 15/13 is interested in your comments, and we are also interested in learning your approach to media security (e.g., security requirements for media security and for key management, media security architecture, and media security mechanisms and key management methods).

Attachment:

- Draft Y.SecMechanisms (NGN-GSI/DOC 243)
