3GPP SA1 Chairman, Toon Norp <toon.norp@tno.nl>

3GPP SA1 Liaison Officer, Alain Sultan <alain.sultan@etsi.org>

Dear Frederic and Paolino

Since the beginning of 2017, the VR Industry Forum has been developing our guidelines for high quality, interoperable 360 degree video experiences. At IBC we made a draft of our work available for public comment, which can be found at <http://www.vr-if.org/guidelines/>. A PDF copy is also attached with this letter.

Our initial focus is on OTT streaming and download and we would very much appreciate the views of 3GPP SA4 (and also SA1 if deemed applicable) on our work so far, notably in regard to the overall technical completeness with regard to end-to-end 360 video services. Responses can be emailed to info@vr-if.org, or electronically entered via our e-form which can also be accessed at <http://www.vr-if.org/guidelines/>.

Our ambition is to publish a final version of the guidelines at CES in early January 2018. In order to ensure your comments are appropriately handled, we would prefer if replies were made before 13 November 2017.

Regards

Paul Higgs & David Daniels
VRIF Guidelines Working Group co-chairs
