ITU-T Q5/2 would like to thank JCA-SDN for informing us about the SDN standardization activity roadmap, which really helps us have better understanding about your standardization work on SDN. So far Q5/2 has no study work related to SDN standardization.

Also Q5/2 would like to invite JCA-SDN to keep on informing us about the progress of SDN and its standardization work. Q5/2 would like to encourage contributions on SDN management as a priority work in near future since SG2 is the leading group on telecom management in ITU-T.

Meanwhile Q5/2 would like to ask both JCA-SDN and 3GPP to track the progress of work on <<TR 32.842: Study on network management of virtualized networks>> from 3GPP TSG SA WG5, which could be a very important input to Q5/2.
