Title: WI on the USAT MMS presentation (Rel-7, early implementation)
Document for: Approval
Agenda Item: 7.1.3

Work Item Description

Title

Enhance the USAT MMS presentation

1 3GPP Work Area

	Radio Access
	Core Network
X	Services

2 Linked work items

3 Justification

It is already possible to store a Multimedia Message in the UICC and to send a MM from the USAT.

But it is not possible for the USAT to present a MM to the user, for example as a preview before sending it.

Furthermore, GSMA has already expressed their interest in such development (LS SP-040424, SCP document SCP-030237), and this would fulfil some of their MMS use cases presented in S1-030454.

4 Objective

The MM display capability by the USAT is to be added, using the terminal MMS user agent.

It is noted that no interface problem should occur, as toolkit interactions with the ME already contains the procedures not to monopolise the interface in case of large amount of data to be transmitted.

This Work Item is for Release 7 Early Implementation.
Work item code is UEMMS.

5 Service Aspects

None/Text

6 MMI-Aspects

None/Text

7 Charging Aspects
