**Title: Rel-13 High Priority Items Proposal**  
**Document for: Discussion / Approval**  
**Agenda Item: 5.3 Release-13 content**  
**Release: Rel-13**

***Abstract of the contribution:***  
*Proposal for Rel-13 SA2 Work Items prioritization.*

# Rel-13 High Priority Items

- Thanks to SA2 aggressively progressed Rel-13 WI/SI despite the time limitation.
- Assuming Rel-13 stage 2 targets by SA#68 (June 2015), without change so far.
- The selection should be based on (a) importance of feature to operator and (b) the maturity considering efforts paid so far.

## HIGH PRIORITY WORK ITEMS from DOCOMO

Work item	Achievement (TR maturity)	Analysis and Reasons for Rel-13
<b>DÉCOR</b> (Dedicated Core NW selection)	<b>23.707 – 100%</b> [Remaining time units= 2]	- Enables operators to deploy separate core (eg. virtualized for IoT devices). - TR completed and the solution alternative decided.
<b>GROUPE</b> (MTCe feature) SA2 prioritized items only (#1, #4, #5 (for #4))	<b>23.769 – 70%</b> [Remaining time units= 3]	- Benefit in optimised handling of groups of MTC devices/subscriptions, e.g. congestion handling. - SA2 has successfully prioritized & selected the key issues, i.e., narrow downed the work scope. - Well progress in Key issue & Solution Proposal.
<b>SETA</b> (TrFO for SRVCC)	<b>23.717 – 70%</b> [Remaining time units= 3]	- Essential for VoLTE market demands through higher voice communication quality. - Despite new activity, it shows quite well progress.
<b>TEI13 B/C</b> (Clean-up)	<b>N/A</b> [Remaining time units= 2]	- Essential work for imminent needs of update.

DÉCOR, GROUPE, and SETA TRs are quite well progressed.

- **NTT DOCOMO's High priority items for Rel-13 are summarized.**
  - **DÉCOR**
  - **GROUPE**
  - **SETA**
  - **TEI13 B/C**
  
- **We request SA to conclude R13 priority decision incorporating this request.**
