### Review of TS 34.109

TS 34.109 specifies the special UE functions required for conformance testing, such as the UE test loop. TS 34.109 is planned to be released for version 3.0.0 in June 2000.

To guarantee consistency with current TSG RAN WG2 core specifications TSG T WG1 would like TSG RAN WG2 to review TS 34.109 prior to the approval of version 3.0.0.

TSG T WG1 appreciate if TSG RAN WG2 can review TS 34.109 (attached to this LS) and send comments to TSG T WG1 <b>latest April 3, 2000.</b>
--

### Transfer of responsibility of TS 34.109 from TSG T WG1 to TSG RAN WG2?

As the scope of TSG T WG1 is to prepare UE conformance test specifications and not to specify UE functions TSG T WG1 would like to transfer the responsibility of TS 34.109 from TSG T WG1 to TSG RAN WG2.

However, due to the tight time schedule to finalise the UE conformance test specifications for R99 TSG T WG1 would like to keep the ownership of TS 34.109 until it has been approved for version 3.0.0.

TSG T WG1 would like to know the opinion of TSG RAN WG2 regarding the future ownership of TS 34.109.
