

TERMS OF REFERENCE as approved at TSG-T #14

**Technical Specification Group Terminals
Working Group 1: User Equipment Testing**

Responsibility

The task of 3GPP TSG-T1 is the drafting of the User Equipment conformance testing specifications (excluding conformance testing specifications of the USIM) for the 3GPP standards. The definition of "User Equipment" is given in TS 23.101 'General UMTS Architecture'.

Work Plan

The work plan includes :

- RF performance conformance testing of FDD
- RF performance conformance testing of TDD
- RRM conformance testing of FDD
- RRM conformance testing of TDD
- UTRA and NAS Protocol testing
- Testing of Inter RAT procedures, UTRA to GERAN only Service capability testing (for services where 3GPP core specification exist)
- Formal description of protocol test cases using TTCN

Working Groups

- RF sub-group
- Signalling sub-group

Liaisons

TSG-T1 has direct liaisons with all groups within 3GPP.

TSG-T1 has direct liaisons with external groups on the 3GPP external liaison list (<http://www.3gpp.org/management/liaisons.htm>).
