## **1. Overall Description**

T1 noted that TSG-T rejected a CR to add a Release 5 feature into TS 34.108 on the basis that this addition would create further workload for companies maintaining this specification as three versions of each CR will be needed.

T1 proposes as an interim solution that Release 5 features for TS 34.108 will be collected in an Annex of the Release 4 version of the specification until enough features have accumulated to warrant the additional maintenance effort.

## **2. Actions:**

**None required.**

## **3. Date of Next T1 Meetings:**

T1/SIG#28                      10 – 14 February 2003      San Antonio, US
