

Draft Terms of Reference for TSG-T WG3

Source: 3GPP TSG-T WG3 (USIM)

1 Responsibilities

Development and maintenance of specifications and associated test specifications for the 3G USIM, and its interface with the Mobile Terminal.

2 Tasks

- to design USIM functionality to support 3G security requirements;
- to provide capabilities for service creation (e.g. evolution of SIM Application Toolkit, APIs);
- specification of the USIM application as part of a multi-application card in a single/multi-card reader terminal environment;
- to evolve current service capabilities based on the SIM into a form suitable for 3G (e.g. user groups for ADN, storage of call records), maintaining backwards compatibility;
- to enhance the current electrical and mechanical interface of the SIM (e.g. electrical parameters, transport protocol, size) maintaining backwards compatibility;
- to provide plastic roaming from GSM to 3G systems and to study plastic roaming from other 2G systems to 3G systems;
- to study plastic roaming from 3G to 2G systems.

3 Liaisons

- with ETSI SMG9 for compatibility with GSM and generic ETSI IC Cards;
- with ARIB 27 control group for compatibility with PDC.
