Change of affiliation for the chairman of 3GPP CT WG1

Dear Colleagues,

On behalf of InterDigital, I would like to announce that Mr. Atle Monrad, chairman of 3GPP CT WG1 has changed company affiliation from Ericsson to InterDigital.

To not disrupt the ongoing CT WG1 activities, InterDigital will continue to offer Atle Monrad the support and the resources needed to continue to pursue the CT WG1 activities successfully until the end of his current term, April 2019.

InterDigital is committed to support Atle in this role and make this transition as seamless as possible. Atle has been chairing CT and CT1 WG1 for 14 years and has proven throughout his career to be capable of chairing in a fair, technical, and time efficient manner. I am positive that Atle's chairing and dedication to serve the 3GPP community will remain unchanged. He has already participated in antitrust and competition law training and will continue to comply with all applicable antitrust/competition laws and regulations while acting in his capacity as CT WG1 Chairman.

Atle Monrad will represent the Individual Member "InterDigital Europe Ltd." and the Project Partner "ETSI".

Yours sincerely,

Diana Pani,
Director, Standards and Systems
