04. November 2013

Dear Mr. Piednoir

Morpho Cards as a full member of ETSI is committed to the standardisation work of 3GPP and is therefore pleased to support the candidature of Heiko Kruse for the position of vice-chairman of 3GPP TSG CT WG6, Smart Card Application Aspects.

Since 1997 Heiko is actively representing Morpho Cards (and formerly Sagem Orga and ORGA Kartensysteme) in various standardisation bodies, including especially ETSI and 3GPP. He has been serving 3GPP CT Working group 6 for 4 Years as the chairman. With his long experience and his dedication to standardisation work, we are confident that Heiko can be beneficial for the ongoing evolution of standards.

With best regards

Yves Portalier
SVP Telecoms Business Unit
e-Documents Division
Morpho Cards GmbH

Heiko Kruse is responsible for the evaluation of new technologies, strategy development and the representation of the Morpho e-Documents Telecoms Division in standardization organizations. Before working in this position, Heiko Kruse was Head of the Product Line 3G, Head of Technology Innovation and Standardization and before that Head of Product Management Telecommunications. He held previously various positions in Product Management, Marketing and Sales at Morpho. Before joining Morpho he worked for an engineering company in Hamburg as a planning engineer. Heiko Kruse holds a university degree in electronic engineering from the University of Bremen, Germany.

ABOUT MORPHO

Morpho, a high-technology company in the Safran group, is one of the world's leading suppliers of identification, detection and e-document solutions. Morpho is specialized in personal rights and flow management applications, in particular based on biometrics, a sector in which it is the world leader, as well as secure terminals and smart cards. Morpho's integrated systems and equipment are deployed worldwide and contribute to the safety and security of transportation, data, people and countries.

Through its e-Documents Division, Morpho is a worldwide leader in identity documents and secure credentials. It delivers trust in the digital world through smart cards, passports, tokens, personalized and blank documents. The technology expertise of the e-Documents Division shapes the markets for the ID document, payment, telecoms and Identity Access Management segments. With 2,800 employees, world-wide subsidiaries and 6 production and 9 development centers, the Division is close to its customers all over the globe.
