Letter of support and nomination for 3GPP TSG RAN WG2 chairman candidature.

Dear Ms Kooistra and Mr Chung,

Mediatek is delighted to nominate Mr. Johan Johansson as a candidate for the position of Chairman of the 3GPP TSG RAN Working Group 2, representing the individual member MediaTek Beijing Inc., a member of organizational partner CCSA.

Johan has worked in Telecommunications for over 20 years, in product development, standardization and research, in the context of network products and mobile devices, in technical and leading positions. He has been a main contributor in 3GPP RAN2 and RAN3 since 2004, also holding positions as TS and WI rapporteur. Johan joined MediaTek in 2010 and is currently working as Senior Standards Specialist focusing on Uu Layer 3 and 2. A brief CV is attached.

We believe that Johan will be able to positively lead RAN2's activities, building on already established good practices in RAN2, promoting fairness, efficiency, clarity and high quality, demonstrating perceptiveness, leadership qualities and technical abilities.

MediaTek is committed to the 3GPP standardization and will give the full support and resources necessary for Johan to fulfill the 3GPP TSG RAN WG2 Chairman activities successfully. Johan will be trained to comply with all applicable antitrust/competition laws and regulations while acting in his capacity as WG Chairman.

Yours sincerely,

Ho-Chi Huang
General Manager
MediaTek Inc.

Brief Curriculum Vitae - Johan Johansson

History Summary

Born 1968, in Sweden (46 years old)

M.Sc. 1993, Royal Institute of Technology, Stockholm, Sweden

Since 2010, Mediatek Inc.

- Senior Standards Specialist, standards and related research.
- 3GPP RAN WG2 (regularly), WG3 (occasionally), Plenary (occasionally regularly).

2006 – 2010, Huawei Sweden AB

- Research Group Line Manager, RRM, Standards and pre-standards research
- 3GPP Standards, RAN WG2.

1993 – 2006, Ericsson AB

- 3GPP Standards, RAN WG3
- Systems Engineering, Sr Staff Engineer, Cdma2000, San Diego
- Systems Engineering, CPP Middleware and Platform
- Systems Engineering and applied research, AXE Control System

Miscellaneous

- A driving and productive delegate in RAN WG2 since 2006, and in RAN WG3 since 2004, providing constructive input in a wide range of topics.
- Rapporteur of TS 36.214, WI MDT (minimization of drive test) and WI eDRX.

Specialties, built on experience

General; Telecommunication functionality just above the hardware level and related architectures, e.g. L2 and L3 of communication and control protocols, software development, middleware, operating systems, and related OAM support.

3GPP specific; Expert level understanding of LTE L2 and L3, the related protocols, MAC, RLC, PDCP, RRC, S1 AP, X2 AP, LPP, and the related usage and algorithms, thorough understanding of UMTS L2 and L3.

LTE System; System Level performance evaluation, data scheduling, quality of service, UE mobility.

Leadership; Organization, Personal leadership and development, leading highly competent individuals in multi-cultural and heterogenous environments. Leadership in small and large projects.
