Subject: Candidacy of Ms. Feifei Lou as Vice Chair of 3GPP TSG SA WG1

Dear Ms. Comin, Mr. Sultan and members of TSG SA WG1,

Nokia is pleased to nominate Feifei Lou as candidate for the 3GPP TSG SA WG1 Vice Chair elections to be held during the meeting 3GPP SA1#112.

Feifei represents Nokia Corporation (ETSI).

Feifei has 20 years of experience in 3GPP standards and industry organizations, and has contributed to various aspects of 3G to 6G standards. She started her 3GPP journey back in 2007 and joined SA1 in February 2023 (3GPP SA1#101). Her contributions in SA1 spans across 6G system and operational aspects, satellite, UAV, and mission-critical services.

Feifei is well informed about and aware of the antitrust/competition laws and regulations of relevant jurisdictions. If elected, she will comply with such laws while acting in her capacity as 3GPP TSG SA WG1 Vice Chair.

As an indication of strong sustained commitment to 3GPP, Nokia will provide all necessary support and resources to Feifei to allow her to fulfil her role as the 3GPP TSG SA WG1 Vice Chair if elected.

Yours sincerely,

A handwritten signature in black ink, appearing to read "Ulrich Dropmann".

Ulrich Dropmann – Head of Standardization & Industry Environment, Nokia

Feifei Lou
Email: feifei.lou@nokia.com

Feifei Lou has 20 years of telecom experience, encompassing strategic planning, standardization, and large-scale technology program management. She has extensive experience with international organizations in the communication technology domain, e.g. 3GPP, NGMN, GSMA. She has many years of board-level engagement in different ecosystems and possesses a comprehensive understanding of the global mobile ecosystem across Asia Pacific, Europe, and North America. Her expertise spans a wide range of aspects of networks, services, devices, and security. She has served as an alternate board member for NGMN and vice chair of technical working groups.

Currently, she is Principal Standardization Lead at Nokia, leading 3GPP SA1 and GSMA Networks Group delegations, with specific focus on 6G, satellite, UAV, mission-critical services and roaming. Previously, she held executive program management role at NGMN, managing a portfolio of projects including 6G and 5G initiatives. Earlier roles at CMRI involved standardization strategy development, 3GPP delegate (RAN3, SA plenary), and program management for LTE and 5G projects.

Experience

2023.2 – Present	Principal Standardization Lead Nokia, Munich, Germany
2019.1 – 2023.1	Executive Program Manager/Senior Program Manager NGMN, Frankfurt, Germany
2006.10 – 2019.1	Senior Program Manager/Standards Manager/Project Manager CMRI, Beijing, China

Education

2002.8 – 2006.1	M.S. in Mobile Telecommunications - Dept. of Electrical and Computer Engineering, Rice University, Houston, Texas, USA
1998.9 – 2002.7	B.E. in Telecommunications Engineering - Beijing University of Posts and Telecommunications (BUPT), Beijing, China
